

SPORTS DRYER

Information & Instructions

WWW.GRITINC.NET

Thank you for purchasing the GRIT Sports Dryer. Proudly designed and manufactured in Canada, the GRIT Sports Dryer allows you to dry your gear anywhere you go! The user guide and tips below will help you to get the most out of your new purchase.

SAFETY

To use your GRIT Sports Dryer effectively and safely it must be hung from a stable position and balanced. Heavy items are hung on the lower racks to stabilize the upper arms for lighter items. Do not expose the unit or anything on it to open flame or direct heat source. Maximum weight 50 lbs.

ASSEMBLY

The GRIT Sports Dryer is easily opened, remove the hanging bracket from the top of the unit. Hold the main body and pulling the top handle to its maximum length. A click will indicate the handle is secure. Each of the six arms will unfold and can then be extended to its maximum length. Please take note of the hooks on each arm to secure your gear.

USAGE

The GRIT Sports Dryer can be used in different locations to enable optimal air drying. To prevent fire when hanging any flammable materials near a heat source, make sure a safe distance is maintained. The GRIT Sports Dryer can be installed as a permanent fixture with common hardware.

- Place the enclosed metal hook on top of a door or closet rod and attach GRIT Sports Dryer to the hook. If you plan to hang the Sports dryer from a bathtub/shower rod be aware that the combined weight may cause damage if the structure is not built to support the extra weight.

STORAGE

1. Remove all items from each extended arm of the Sports Dryer.
2. Depress each of the 6 arms fully to minimize length.
3. Press the tab on the handle and slowly push the handle into the body of the unit until it is fully closed (each arm will lock into position).
4. Using the locator pin on the top of the Dryer's handle, place the hole in the top of the bracket over the pin and snap into place securely for travel or storage. Refer to the PACK diagram on the box, item 1 and 2 for visual direction.

CLEANING

The GRIT Sports Dryer is made of heavy duty plastic and has no soft surfaces to hold odors. Clean as needed with a cloth and mild soap. Air dry the unit by hanging from its own hook in an open space with good air movement.

The GRIT Sports Dryer is PERFECT FOR ALL SPORTS and ACTIVITIES

From Hockey, Soccer, Skiing, Lacrosse, Ringette, Football, Hunting and Fishing to Workout Gear and Winter Clothing, you can dry your gear anywhere you go! Hanging the GRIT Sports Dryer in a well ventilated area will further enhance its drying effectiveness.

SET-UP
